

Contribution of each author (Fill the form if there are three or more authors)*

Title	
Author	Contribution (yes/no)
Conceptualization – Ideas, formulation or evolution of the research’s objectives and general goals.	
Data curation – Managing duties to write down data (produce metadata), filter and keep record of the data (including the software code, whenever necessary to interpret the data themselves) for present or future use.	
Formal analysis – Use of statistical, mathematical, computational or any other technique to analyze or synthesize data.	
Fundraising – Securing financial support for the project that leads to the publication.	
Research – Carrying out the research, specifically conducting experiments or the data/evidence gathering.	
Methodology – Development or design of the methodology and models.	
Management of the project – Responsibility of the management and coordination of the planning and execution of the research.	
Resources – Providing the study materials, chemical reagents, laboratory samples, instruments, patients, animals, digital resources and/or any other analysis tools.	
Software – Software programming and development, design of software tools, implementation of code and supporting algorithms, testing of exiting code.	
Supervision – Responsibility of oversight and leadership in the planning and execution of the research, including the audit external to the core team.	
Visualization – Preparation, creation and/or presentation of the published work, specifically the visualization and presentation of data.	
Writing – first draft – Preparation, creation and/or presentation of the published work, specifically of the first draft (including translations).	
Writing – review and editing – Preparation, creation and/or presentation of the published work by the members of the original research group, and of critical revisions and notes. This includes the stages before and after publication.	
Conceptualization – Ideas, formulation or evolution of the research’s objectives and general goals.
