

Acknowledgements

The following papers were written in preparation to the 38th World Congress of the International Society of Medical Hydrology and Climatotherapy who took place in Lanjaron-Granada, Spain, 20-23 June 2012.

The scientists involved in this task are deeply committed to the research on Dead Sea Climatotherapy and Balneotherapy and participated actively to a special session of the congress on this topic.

We are grateful to the institutions that allowed this project to become true:

- DMZ Medical Center, Lot Spa Hotel, Ein Bokek, Israel and the Department of Dermatology, Hadassah University Hospital, Jerusalem, Israel, in cooperation with the Department of Dermatology, Ludwig Maximilian University, Munich, Germany
