ONE BRAIN - TWO GRAMMARS?

<http://www.iaa.uni-rostock.de/one-brain-two-grammars>

Rostock Universität, 1–3 March 2018

The aim of the workshop is to bring together researchers from different research fields to discuss evidence for and against dualistic approaches to linguistic structure, language processing and cognition. We seek to overcome scientific departmentalism and to follow a truly interdisciplinary approach to language structure and grammar modeling, including research findings from linguistics (e.g. grammatical analysis and modeling, pragmatics, conversation analysis), neurolinguistics, psycholinguistics, and (cognitive) psychology. While trying to keep a broad perspective, we particularly invite contributions within a cognitive–functional framework, qualitative and quantitative analyses of natural language data, and experimental research on the (neuro-)cognition of language and language processing.

Submission of abstracts

Please submit your abstract as a .doc or .docx file to brain.grammar2018@uni-rostock.de from 20 February 2017 to 30 July 2017. Notification of acceptance will be sent out by the middle of September 2017.
