EXPERIMENTAL AND MODELLING MICROMETEOROLOGY

Contents

	Pages
<i>The Prologue</i> Carlos YAGÜE, Enrique SÁNCHEZ and Julia M. REES	7-9
1. <i>Depth of the stable atmospheric boundary layer over a shallow uniform slope</i> A.J. MAGUIRE, J.M. REES and S.H. DERBYSHIRE	11-20
2. <i>A gravity current study within the Palma de Mallorca basin</i> D. MARTÍNEZ and J. CUXART	21-36
3. <i>A study on the nocturnal atmospheric boundary layer: SABLES2006</i> C. YAGÜE, S. VIANA, G. MAQUEDA, M.F. LAZCANO, G. MORALES and J.M. REES	37-53
4. <i>Study of the surface pressure fluctuations generated by waves and turbulence in the nocturnal boundary layer during SABLES2006 field campaign</i> S. VIANA, C. YAGÜE, G. MAQUEDA and G. MORALES	55-71
5. <i>Real-time air quality operational forecasting systems in Spain: an application of the MM5-CMAQ-EMIMO modelling system</i> R. SAN JOSÉ, J.L. PÉREZ, J.L. MORANT and R.M. GONZÁLEZ BARRAS	73-86
6. <i>A simple modelling system to forecast tropospheric ozone concentrations</i> J. BENEITO, M.R. SOLER and M. ALARCÓN.	87-106
7. <i>Net CO₂ exchange in a rural area of the upper Spanish plateau</i> M.L. SÁNCHEZ, B. DE TORRE, I.A. PÉREZ and M.A. GARCÍA	107-116
8. <i>The radiation and energy budget in mesoscale models: an observational study case</i> J. VILÀ-GUERAU DE ARELLANO and P. CASSO-TORRALBA	117-132
9. <i>Micrometeorological modelling in urban areas</i> A. MARTILLI, J.L. SANTIAGO and F. MARTÍN	133-145
10. <i>An eddy-diffusivity/Mass-flux boundary layer parameterization based on the TKE equation: a dry convection case study</i> P.M.M. SOARES, P.M.A. MIRANDA, J. TEIXEIRA and A.P. SIEBESMA	147-161

Contents

11. *Turbulent kinetic energy climatology for present and future climate conditions over the Iberian Peninsula as obtained from a TKE closure scheme in a regional climate model* 163-173
E. SÁNCHEZ, C. YAGÜE and M.A. GAERTNER
12. *Thermodynamics of cumulus clouds* 175-188
S.R. DE ROODE
13. *Comparison between two-single-column models designed for short-term fog and low-clouds forecasting* 189-203
E. TERRADELLAS and T. BERGOT
14. *Buoyant mixing processes generated in turbulent plume arrays* 205-217
P. LÓPEZ GONZÁLEZ-NIETO, J.L. CANO and J.M. REDONDO
15. *Temporal error estimate for statistical downscaling regional meteorological models* 219-241
E.V. DMITRIEV, I.V. NOGOTKOV, V.S. ROGUTOV, G. KHOMENKO and A.I. CHAVRO
